

**why should you use**

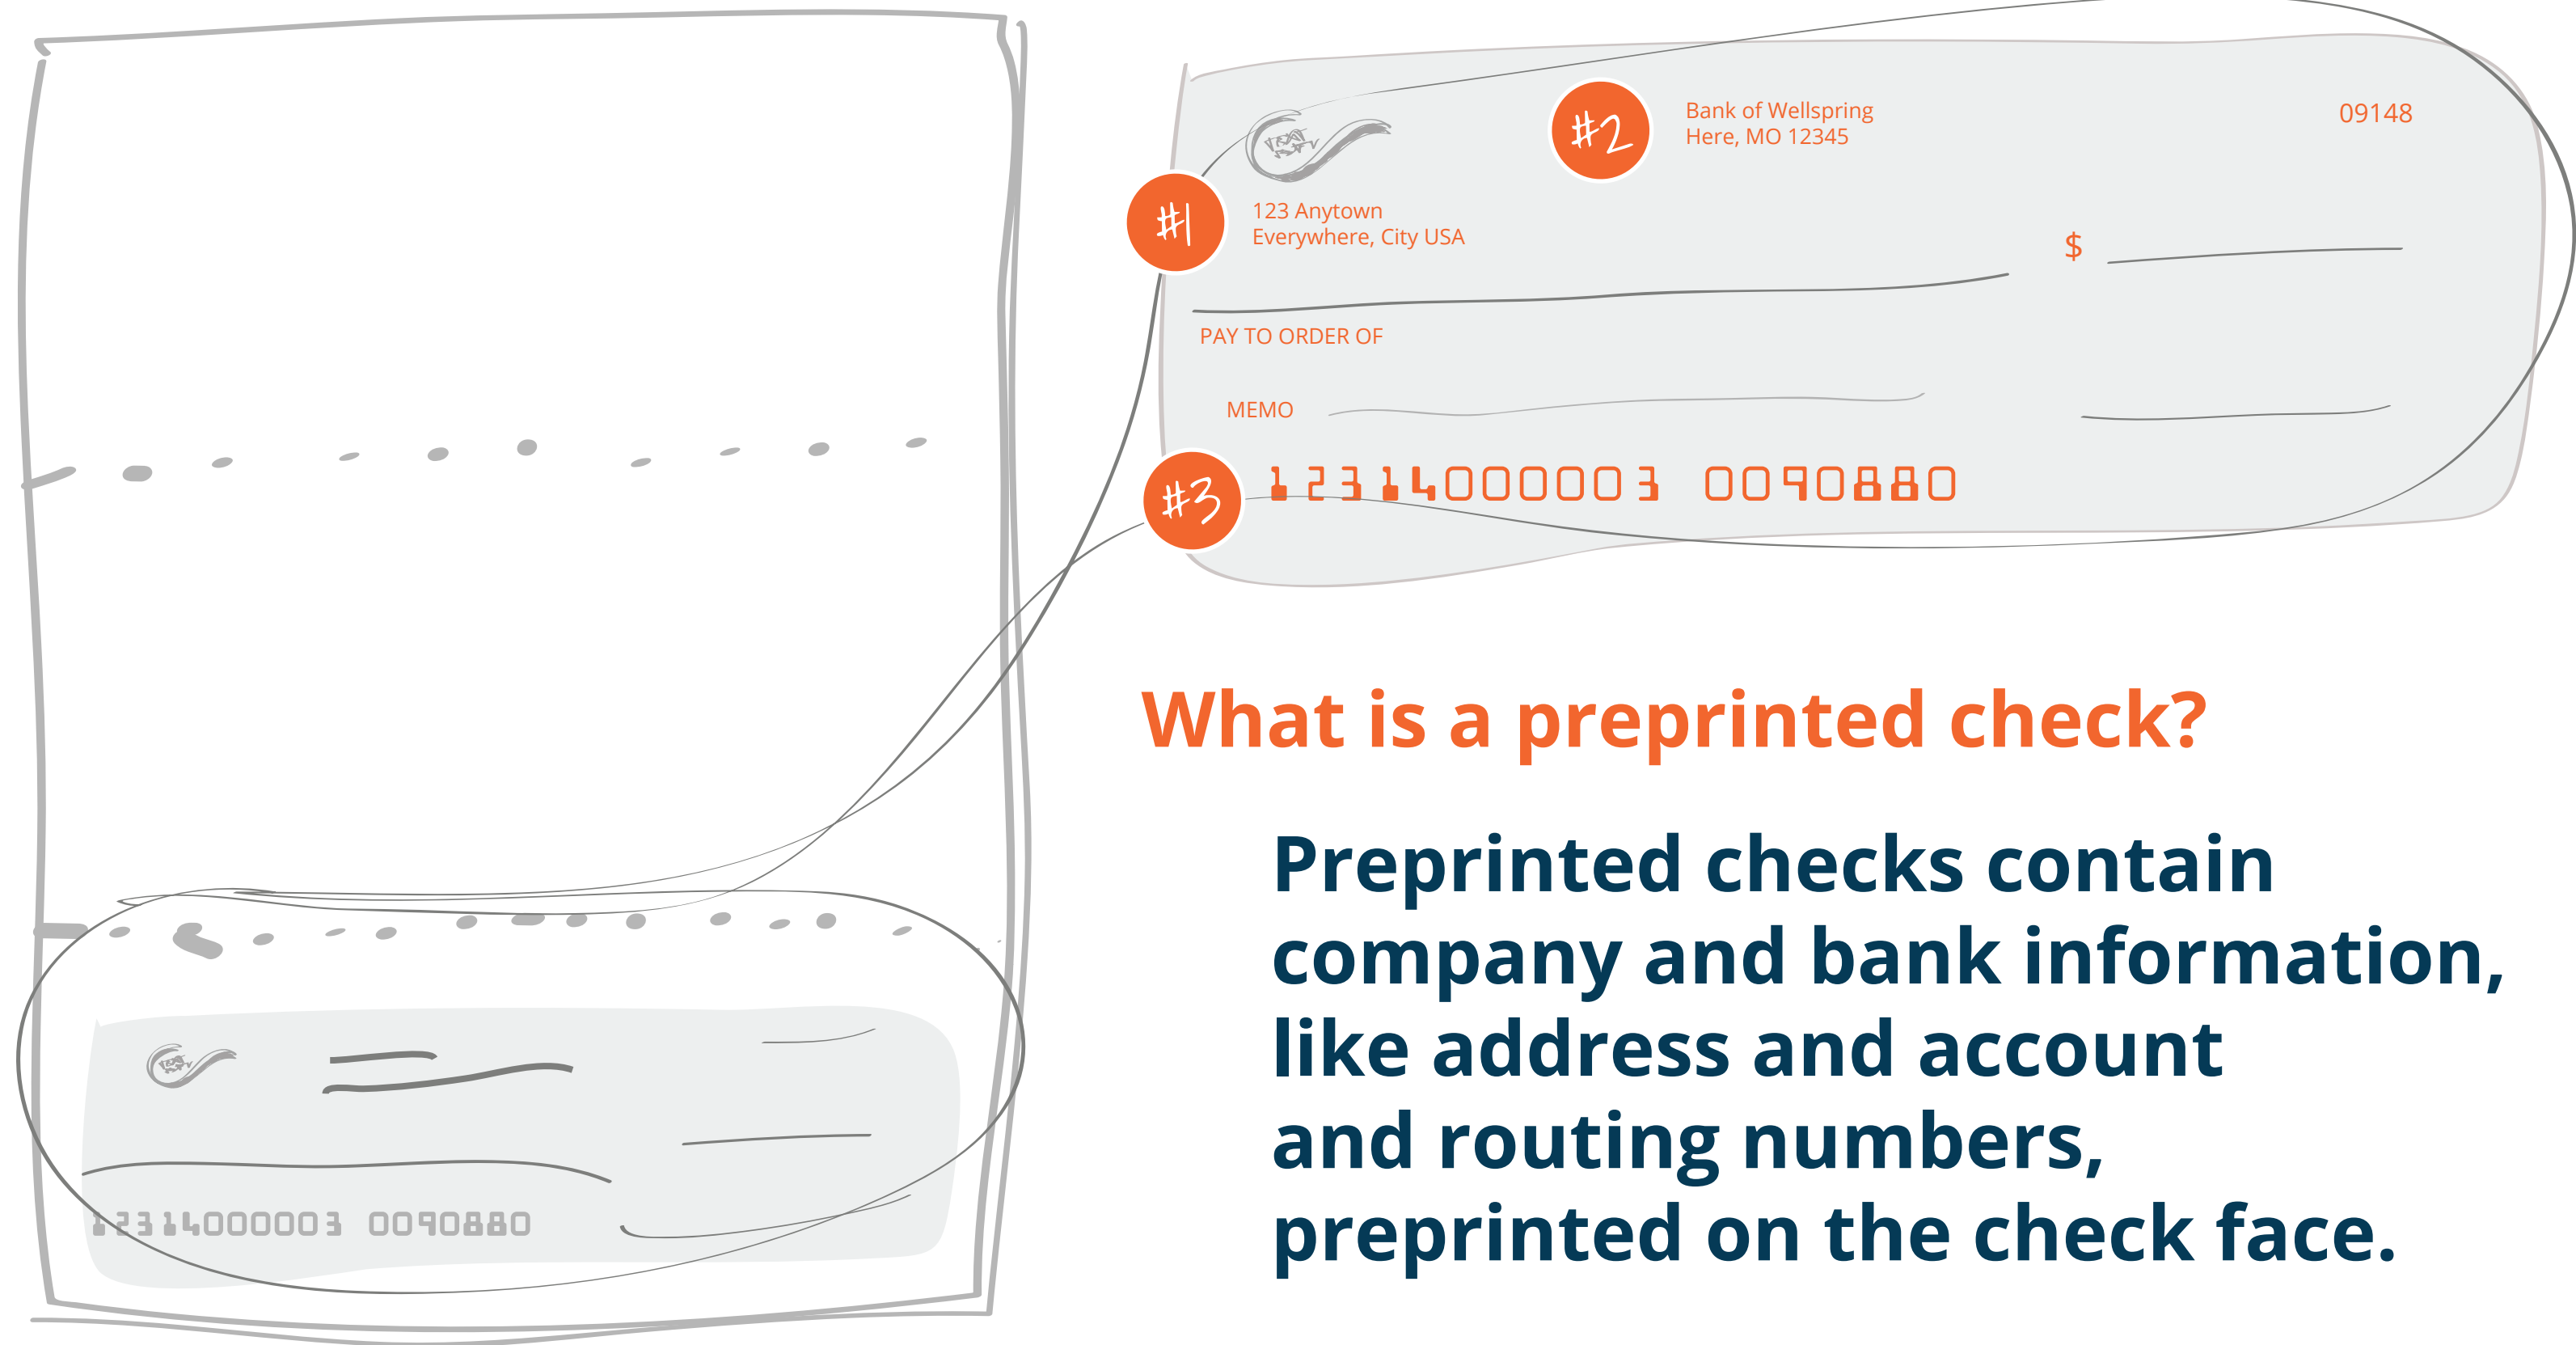

**PrintBoss?**

**Because you currently pay bills or  
employees with preprinted checks**

**What is a preprinted check?**

## What is a preprinted check?

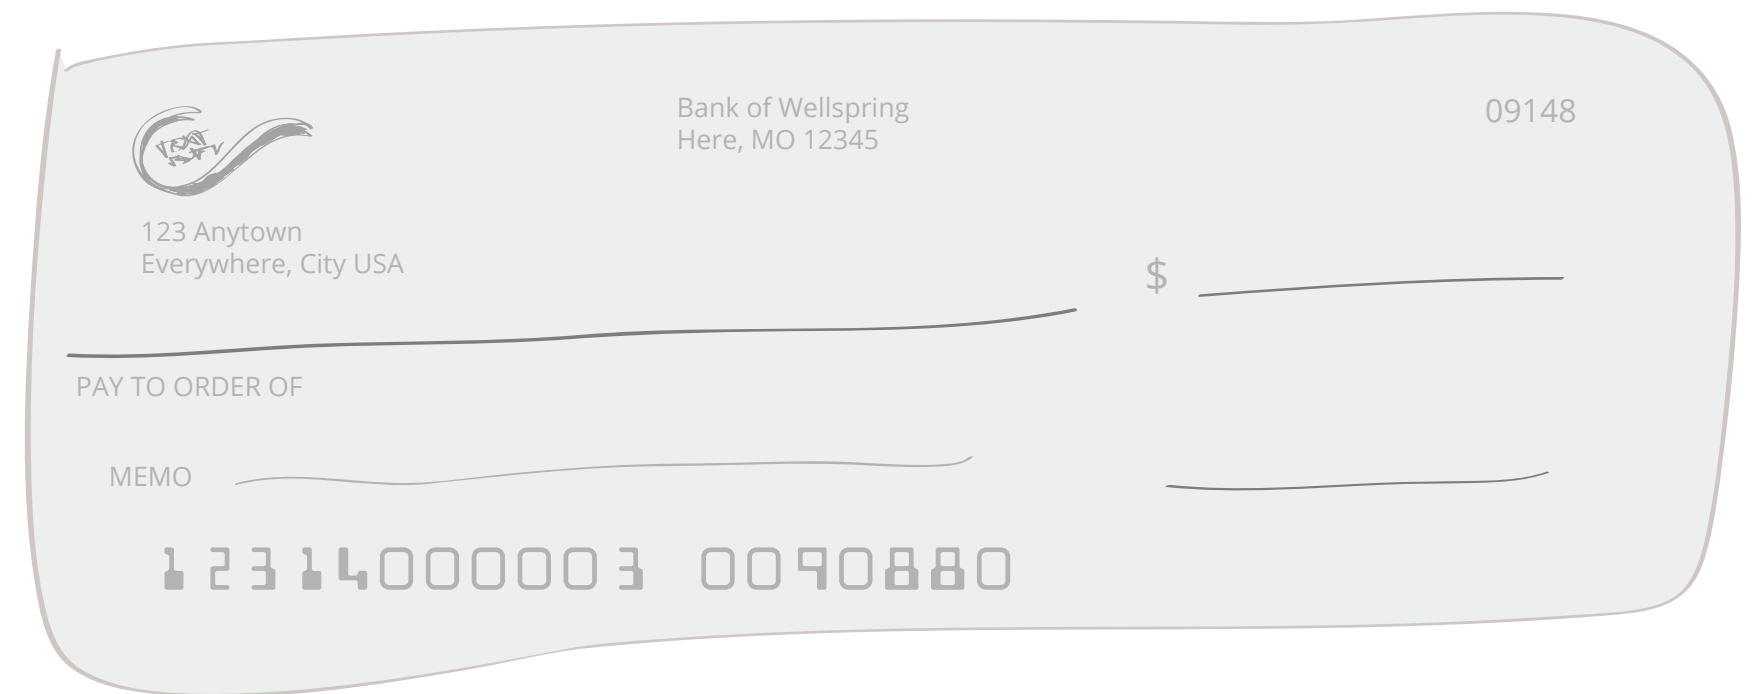

**Preprinted checks contain company and bank information, like address and account and routing numbers, preprinted on the check face.**

**In other words, everything a thief needs to steal your money.**

# The problems with preprinted checks are:

# The problems with preprinted checks are:

**1. You need different stock  
for every bank account**

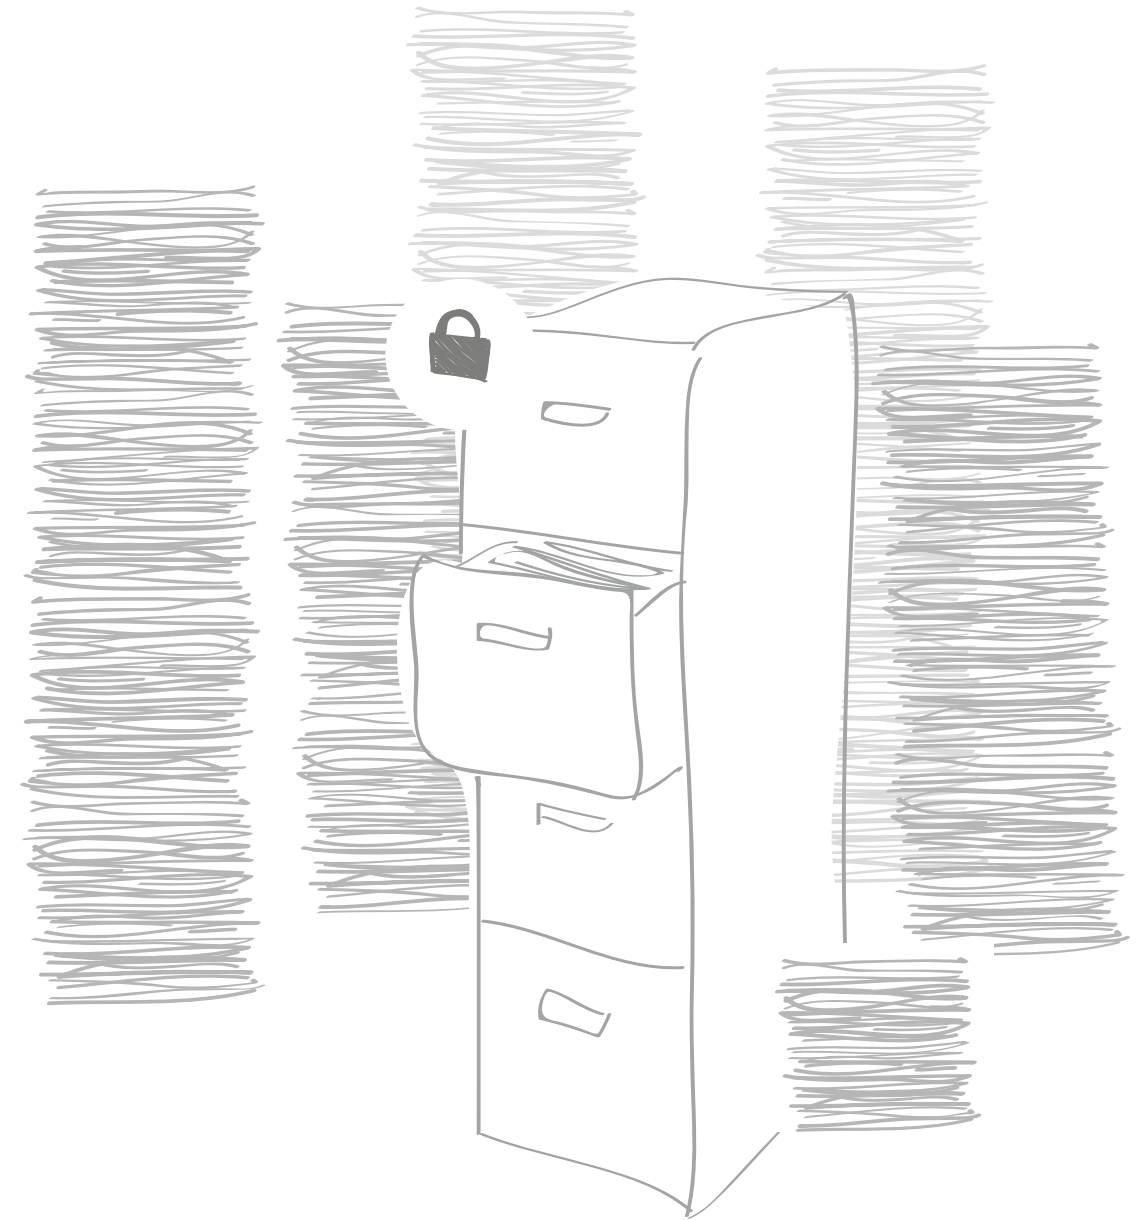

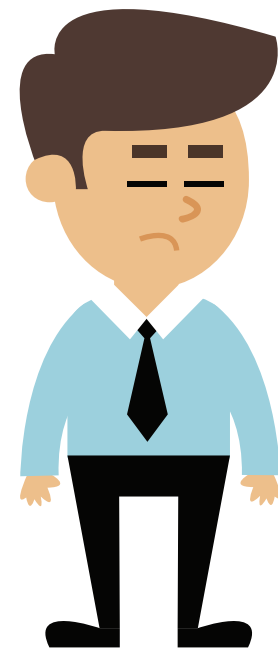

# The problems with preprinted checks are:

- 1. You need different stock for every bank account**
- 2. They're expensive**

# The problems with preprinted checks are:

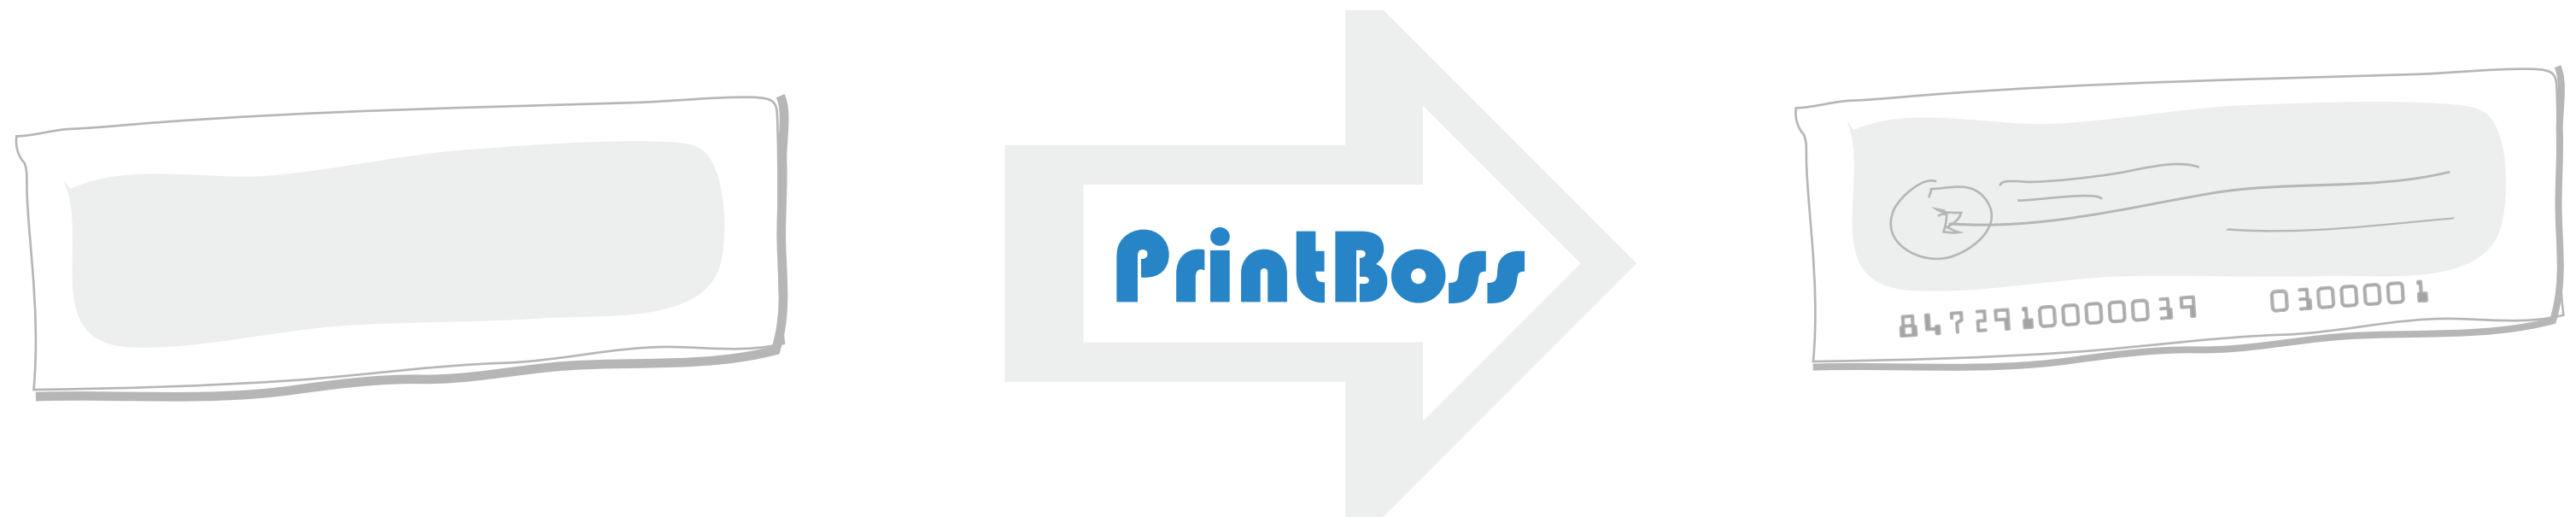

1. You need different stock for every bank account
2. They're expensive
3. Unused stock is a security risk, requiring secure storage

**What's the solution?**

**What's the solution?**

**PrintBoss**

**PrintBoss** solves these problems by  
allowing you to use blank check stock

**Blank check stock  
is better because it:**

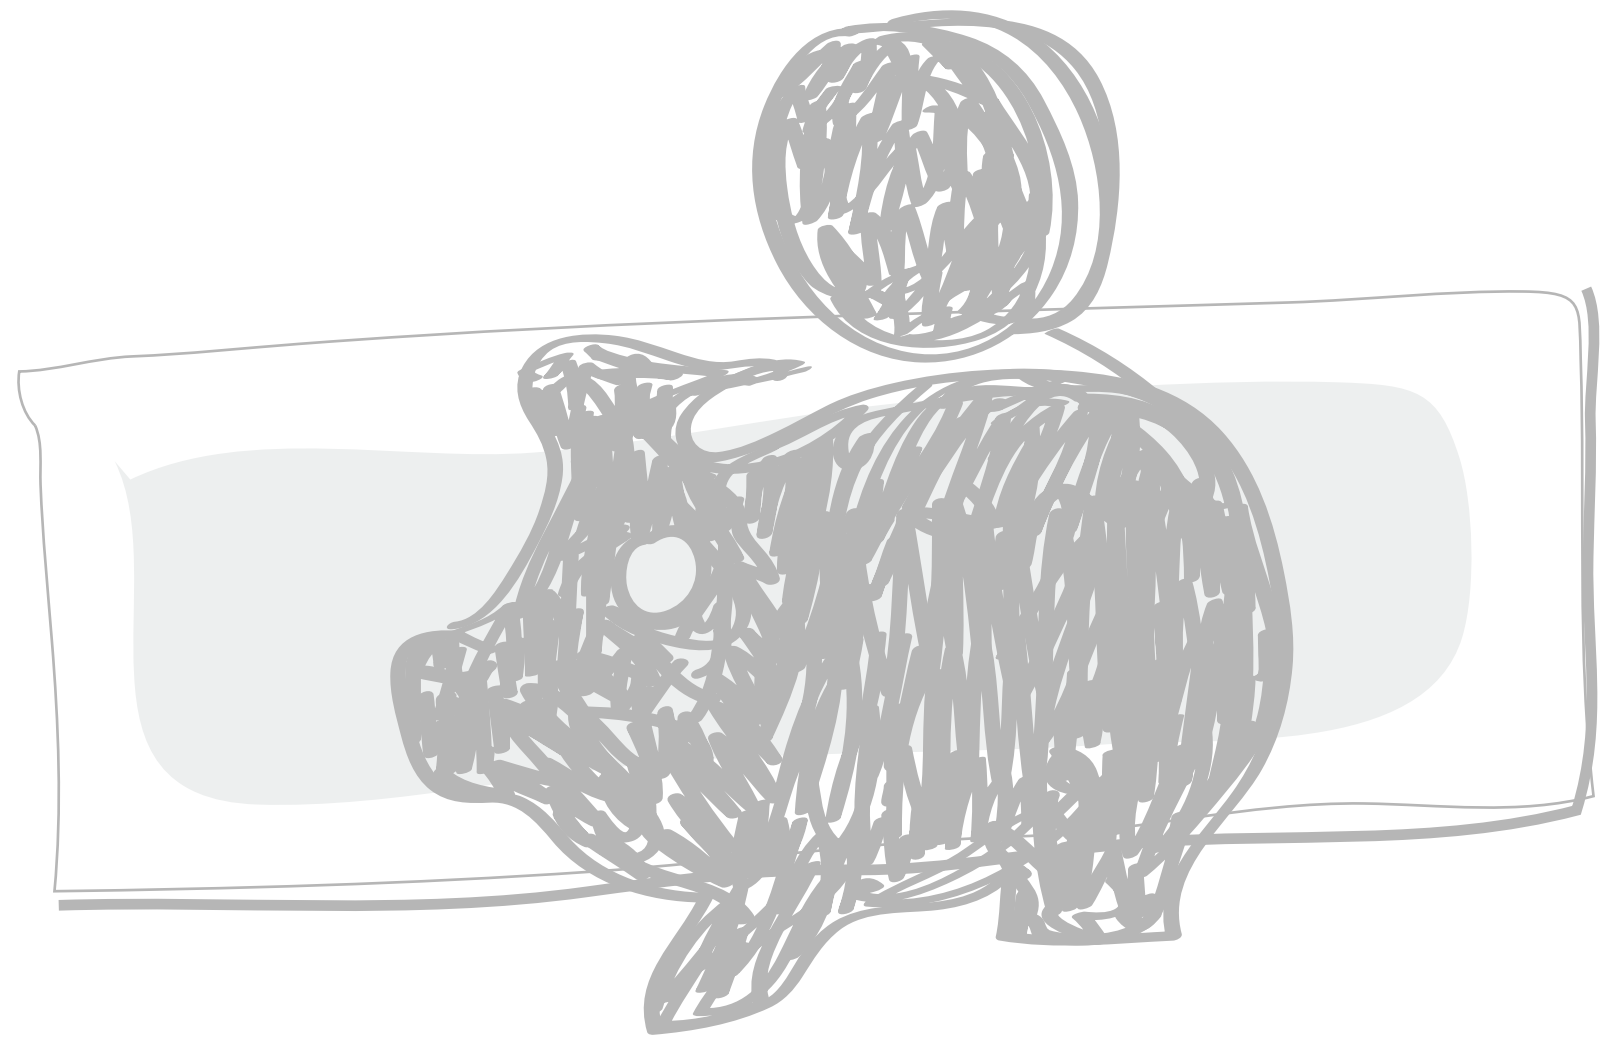

# Blank check stock is better because it:

**1. Is blank, thus unused  
stock is no security risk**

# Blank check stock is better because it:

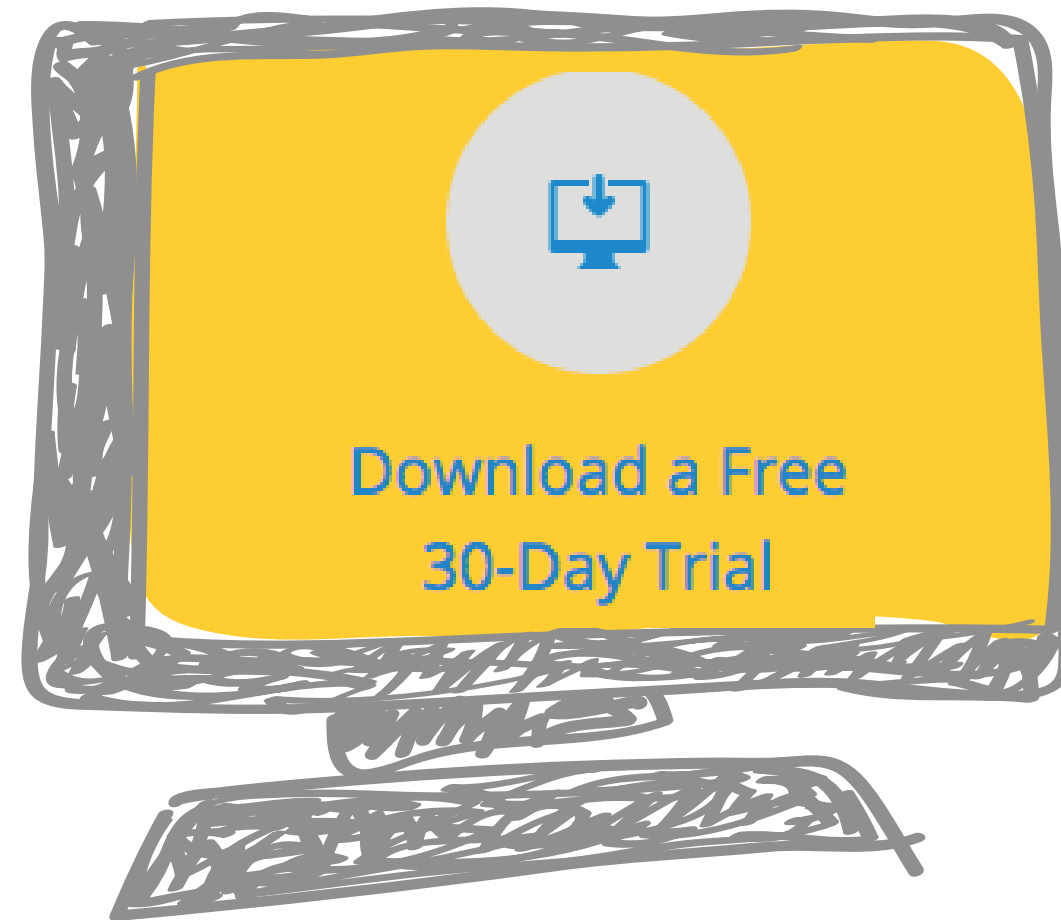

1. Is blank, thus unused stock is no security risk
2. Saves you 80% on the cost of preprinted check stock

# Blank check stock is better because it:

1. Is blank, thus unused stock is no security risk
2. Saves you 80% on the cost of preprinted check stock
3. Can be used with multiple bank accounts
